

Combination preparation tool (Universal Trimming Tool), RADIAFLEX® Cable 1/2" for P-Series connector

The trimming tool improves the cable preparation prior to connector attachment. No further tools are required to prepare the cable for the connector attachment. Due to the unique design of the trimming tool, it combines all necessary functions in one tool. It can be used for all RADIAFLEX® 1/2" cables in combination with the RADIAFLEX® P-Series connector.

The Universal Trimming Tools Series offers the additional advantage to be convertible to different cable sizes (1/4", 3/8", 1/2" and 7/8") only by changing the insert. Different inserts are available as optional items, for references see below or contact your RFS sales contact.
