### RADWIN MultiSector, MS Conn. Model

Sector Base Station - Data Sheet (RW5000/HBS-MS-PRO/5BG5/F54/UNI/EXT)

RW-5BG5-9458

## **Product Description**

RADWIN MultiSector dual carrier base station delivers up to 1.5Gbps via up to 4 external antennas.

The self-contained base station includes a built-in layer-2 Switch that aggregates the dual carrier traffic into a single Ethernet port or a Point to Point self backhaul. An integrated GPS receiver for TDD sync significantly reduces mutual interference between adjacent sites.

The MultiSector base station can cover up to 4 sectors with only 2 frequencies. Carrier resources are shared between 2 antennas using a high performance TDD mechanism.

One of the MultiSector antennas output can be configured as self-backhaul carrying the traffic from all other antennas to hub site, eliminating the need for Point-to-Point (PtP) radio.

features an SFP slot for direct fiber connection.

The unit is fed through a single PoE port and
