

Customer Information | December 2017

Kathrein Special Communication to take over the Business for TETRA/TETRA-Pol.

Dear Valued Sales and Business Partner,

one of our goals is to continuously shape and redefine our portfolio in order to provide our customers more effective product and solution-orientated propositions.

To this effect, we have decided to transfer parts of our business. This will thereby enable both a stronger focus on the core business of the Products Division within KATHREIN-Werke KG, and at the same time help accelerate the business of our new company Kathrein Special Communication.

Starting 1st January 2018, Kathrein Special Communication (KSC) will take over the complete management and sales for the business for law enforcement and emergency services starting at 380MHz with their own portfolio.

Consequently, KATHREIN-Werke KG will now stop its marketing and sales activities regarding this part of the company portfolio (380 – 520MHz) and phase out all related products like antennas, splitter, tapper, filter, combiner, multi-couplers and combiner systems with immediate effect. Parts of the portfolio affected by this phase-out will be transferred to KSC, but offered with new type numbers in the future. Attached please find a list of these transferred products.

Open orders, respectively those which are already confirmed, will be delivered as announced, of course!

New orders for products of the existing portfolio will only be accepted, if they are placed before end of 2017! After this date, only remaining stock will be sold.

The new catalogue for products offered by Kathrein Special Communication will be published on our homepage www.kathrein.com / Special Communication.

Please note, this catalogue is currently under construction – we will inform our customers and partners about the new content, as soon as the catalogue is finished!

Please contact from 1st of January 2018 at the latest
Kathrein Special Communications for new orders and sales support:

KATHREIN Special Communications GmbH
Prof.-Dr.-Anton-Kathrein-Str. 1
