

High performance site components

Introduction

Egant AB is one of the leading suppliers of products for Cellular infrastructure.

Specialised in products that makes it possible to share antenna systems, combining signals and designing cost effective mobile networks.

**Egant AB works close together with its customers to make solutions and projects optimized for today's demands.
Giving you products that is always in the latest design and highest technology.**

Our design centre in Stockholm Sweden is always happy for new challenges and welcomes all new projects and design ideas.

FM Splitter **88 - 108 MHz**

Splits signals in 2 ways

The FM splitter is designed to split unequally one input signal into 2 outputs.

When building an indoor coverage system the splitter is often used to split signals between floors and antennas. The functionality of handling both transmitting and receiving signals in the same path is highly beneficial since the TX signal is split and the RX signal is combined in the same stage and component.

FM bandwidth, 88 - 108 MHz

All Egant power splitters are individually designed to be as future proof as possible.

Design Highlights:

- Low insertion loss
- Low intermodulation
- Easy installation
- No active components (robust design)

Technical Specifications for FM Splitter

Below are some typical data. For more detailed information, please contact us.

Electrical Specifications	2-Way FM Splitter
Product number:	EG 605 0044
Passband:	88 - 108 MHz
Input return loss:	≥ 18 dB
Coupling/Insertion loss:	
Input to Out 1	< 10.0 dB, typ 9ddB
Input to Out 2	< 1.0dB dB, typ 0.8dB
Max input power/port:	60 W
3 rd order intermodulation:	
IM3, 2 x 43 dBm:	≤ -110 dBm (153 dBc)
Impedance in/out:	50 Ohm
Mechanical Specifications	
Dimensions (W x H x D):	190 x 25 x 82 mm
Connectors:	N (f)
Weight:	1.2 kg
Environmental Specifications	
Temp. range (normal operation):	-30 to +70°C
Humidity:	Relative 5 - 100%
Sealing:	IP65

Egant reserves the right to change this product specification at any time without notice.

Power Splitters, Broadband
88 - 2700 MHz
FM, TETRA, NMT, GSM900,
GSM1800, UMTS and LTE

Splits signals in 2 ways

The power splitter is designed to equally split one input signal into 2 outputs.

When building an indoor coverage system the splitter is often used to split signals between floors and antennas. The functionality of handling both transmitting and receiving signals in the same path is highly beneficial since the TX signal is split and the RX signal is combined in the same stage and component.

Installation bracket

Use flexible stainless steel mounting bracket EG 300 0306 for Power Splitter with DIN connectors or the EG 699 0005 bracket for N version.

Superior bandwidth, 88 - 2700 MHz

All Egant power splitters are individually designed to be as future proof as possible. They are extremely broad banded to accommodate for tomorrow's cellular systems, thus minimizing the need to replace older components when adding new services into a system.

Design Highlights:

- Low insertion loss
- Low intermodulation
- Easy installation
- No active components (robust design)

Technical Specifications for Power Splitters

Power Splitters, Broadband 140- 2200 MHz

Splits signals in 2,-ways

The 2-way splitters is designed to equally split one input signal into 2 outputs.

When building an indoor coverage system the splitter is often used to diverge signals between floors and antennas. The functionality of handling transmitting and receiving signals in the same path is highly beneficial as the TX signal is split up and the RX signal is combined in the same stage and component.

High bandwidth, 140 - 2200 MHz

All Egant power splitters are individually designed to be as future proof as possible. They are extremely broad banded to accomodate for tomorrow's cellular systems, thus minimizing the need to replace older components when adding new services into a system.

Design Highlights:

- Low insertion loss
- Low intermodulation
- Easy installation
- No active components (robust design)

Power Splitters, Broadband
376 - 2700 MHz
TETRA, NMT, LTE800, GSM900,
GSM1800, UMTS and LTE2600

Splits signals in 2-ways

The power splitter is designed to equally split one input signal into 2 outputs.

When building an indoor coverage system the splitter is often used to split signals between floors and antennas. The functionality of handling both transmitting and receiving signals in the same path is highly beneficial since the TX signal is split and the RX signal is combined in the same stage and component.

Installation bracket

Use flexible stainless steel mounting bracket EG 300 0306 for Power Splitter with DIN connectors or the EG 699 0005 bracket for N version.

Superior bandwidth, 376 - 2700 MHz

All Egant power splitters are individually designed to be as future proof as possible. They are extremely broad banded to accommodate for tomorrow's cellular systems, thus minimizing the need to replace older components when adding new services into a system.

Design Highlights:

- Low insertion loss
- Low intermodulation
- Easy installation
- No active components (robust design)

Power Splitters, Broadband
698 - 2700 MHz
GSM900, GSM1800, UMTS, W-LAN

Splits signals in 2, 3 or 4 ways

The 2-way, 3-way and 4-way power splitters are designed to equally split one input signal into 2, 3 or 4 outputs.

When building an indoor coverage system the splitter is often used to diverge signals between floors and antennas. The functionality of handling transmitting and receiving signals in the same path is highly beneficial as the TX signal is split up and the RX signal is combined in the same stage and component.

High bandwidth, 698 - 2700 MHz

All Egant power splitters are individually designed to be as future proof as possible. They are extremely broad banded to accommodate for tomorrow's cellular systems, thus minimizing the need to replace older components when adding new services into a system.

Design Highlights:

- Low insertion loss
- Low intermodulation
- Easy installation
- No active components (robust design)

Power Tappers 88 - 2700 MHz

Low loss design

The Egant Power Tapper is designed to tap off a portion of the signal in one direction while allowing the rest of the signal to pass through with a minimum of loss.

A power tapper is often used to tap off signals to antennas when building indoor or tunnel networks. The Egant Power Tapper comes in seven degrees of tapping, making it easy to choose the one that taps off the desired amount of power to the antenna.

Superior bandwidth, 88 - 2700 MHz

The extremely broadbanded Egant Power Tapper is designed with ease of installation in mind. Its robust mechanical shape allows for simple attachment to a wall using clips or straps.

Installation brackets

Use the flexible bracket EG 699 0005 for Power Tappers, both for N and DIN connectors.

Technical Specifications for Egant Power Tappers

Below are some typical data. For more detailed information, please contact us.

Electrical and Mechanical Specifications

Frequency Band:	88 - 1000 MHz & 1710 - 2700 MHz
Input return loss:	≥ 16.0 dB
Max input power:	500 W avg. / 3 kW peak
Impedance in/out:	50 Ohm
Dimensions (W x H x D):	145 x 60 x 40 mm
Installation support:	Brackets: EG 300 0306 (7/16), EG 699 0005 (N)
3 rd order intermodulation:	
IM3, 2 x 43 dBm:	< - 110 dBm / 153 dBc

Environmental Specifications

Temp. range (normal operation):	-35 to +70° C
Humidity:	Relative 5 - 100%
Sealing: N (f)	IP65
Sealing: 7/16 (f)	IP67

Brackets for Power Splitters, Power Tappers, Combiners and Couplers

Adjustable brackets, optimized for tunnels and harsh environments

To simplify installation our brackets are multi-adjustable and made with ease of installation in mind.

Save money

Our brackets are optimized for Power Tappers, Power Splitters, Combiners and Couplers. When opting for quick and easy installation, make sure to use our tailor made stainless steel or aluzinc brackets.
