

OMNI FIT[™] high performance connectors are designed for use with both CELLFLEX® (copper) and CELLFLEX® Lite (aluminum) cables. They are designed specifically to provide the highest quality c onnector- cable interface while simplifying and speeding up connector attachment. The 4.3-10 co nnector is an innovative, space-saving RF connection meeting all requirements even under the m ost severe environmental conditions and not relying on coupling nut torque to meet PIM perform ance.

FEATURES / BENEFITS

- Cost effective two-piece design for safe and easy installation
- Compatible with copper and aluminium cable types i.e. one connector for both outer conducto r materials eliminates the risk of faulty connector installation and helps to keep inventory down
- Robust mechanical design for low and consistent intermodulation performance i.e. keeps the mobile network performance up reduces the number of dropped calls and avoids revenue loss es
- Superior electrical performance for consistent and repeatable VSWR i.e. ensure network syste m performance
- Waterproof to IP 68 i.e. no downtime risk, secures revenue
 RoHS (EU) and CRoHS (China) compliant i.e. can be used on a global basis
